

JooVuu X Quick Start

Button Information:

1. Micro-HDMI port
2. Back recording LED
3. Vent & microphone point
4. Mini-USB port
5. On/Off button
6. Reset button
7. MicroSD slot
8. Mode/WiFi button
9. Record button
10. Recording/standby LED
11. WiFi LED

Important Information:

- The camera will enter mass storage mode when plugged into the PC. As such you will **NOT** be able to record, change modes, or enable WiFi.
- Most phones/tablets running Android 5.0 and above will prompt you if you want to connect to a none-internet WiFi connection. You must click 'Yes' or you will not be able to connect to the JooVuu X.
- For the full manual a full feature breakdown please visit: **www.JooVuu-X.com/support**
- The JooVuu X WiFi password is **1234567890** by default.
- We recommend charging the camera for 1hour prior to any use.

General Operation:

- The RECORD button stops and starts the recording.
- The MODE button has three functions (all must be carried out when the camera is in standby mode (green blinking)):
 - o Change which mode the camera is in – press once to change mode
 - o Manually format the microSD card – when the camera is in standby (green blinking) press and hold for 5 seconds and then at the same time quickly press the power button then release the mode button.
 - o Turn WiFi on and off – hold for 3 seconds whilst camera is in standby mode (green blinking)
- The POWER button has two functions:
 - o Turning the camera on and off. Press the button to turn the camera on. Hold the button for 3 seconds to turn the camera off.
 - o Locking a file – when the camera is recording press the button to lock the file.

Setting Up The JooVuu X

1. Insert the microSD card into the side of the camera.
2. Format the microSD card. This action **MUST** be done in the camera. Please see the relevant section in this booklet.
3. Once the microSD card has successfully been formatted, unplug the JooVuu X. Wait 3 seconds and plug the JooVuu X back in to the car charger or wall USB plug. The camera will turn, make a beeping noise and record automatically (blinking red).

Connecting the JooVuu X to the JooVuu X App

If you are using an Android 5.0 or above device, please make sure you read the ‘Important Information’ section at the top of the booklet.

1. Search and download – JooVuu X in the iOS and Google App Stores.
2. Insert the microSD into the JooVuu X.
3. Turn on the JooVuu X.
4. Make sure the JooVuu X is in standby mode (green blinking).
5. Press and hold the MODE button for 5 seconds and then release.
6. The top LED will turn blue (it may take 1-2 seconds for this to happen).
7. On your phone/tablet connect to the JooVuuX WiFi network.
 - The default password is **1234567890**.
8. Once connected, open the JooVuu X App – a message will appear saying: Camera Connected.
 - If it does not, on the JooVuu X App homepage please press the box in the bottom right corner, then press ‘connect’.
9. You have successfully connected to the JooVuu X you can now change any settings you want to, watch videos, and more!

Manual formatting:

1. The camera is powered and in standby or powered but turned off.
2. Insert a microSD card into the camera.
3. Press and hold down MODE button for 5 seconds .
4. Whilst still holding the MODE button press the POWER button quickly.
5. Release both the MODE and POWER buttons.
6. The top LED should flash red – this means the card has been formatted successfully.

App formatting:

Once the JooVuu X App and Camera have been successfully connected please read the below instructions

1. On the JooVuu X App homepage please press the 'logo'.
2. A new screen will appear.
3. A button called 'Format Camera/MicroSD' card will be on this screen.
4. Press this button.
